

Navigation Support Services - Superyachts

Da Gama Maritime are an ISO9001 accredited company who operate as a distributor for the United Kingdom Hydrographic Office (UKHO) and other providers of navigation related services. Our aim is to support the Captain, crew and management companies in a number of areas designed to assist in maintaining their safety through an unsurpassed level of professional navigation support.

So where can we assist you?

Navigation support related services include but are not limited to the supply of:

- Tender plotter cards (Garmin and Navionics)
- Regulatory and Flag state required publications and log books
- Subscriptions to other relevant electronic licences and products
- Access to an on-line catalogue of navigation and safety supplies
- All UKHO digital products including AVCS, ARCS, eNP's and ADP's
- Official paper charts – BA, NOAA, Norwegian, Dutch, Japanese, Australian
- Official and unofficial chart licences via Transas, C-Map and Timezero (Maxsea)
- Pay-As-You Sail (PAYS) service for the receipt of charts and updates to your ECDIS

Who will look after you?

We believe clients should receive a level of service unmatched by any other provider. We utilise our experience and professionalism to allocate each client a dedicated account manager each with maritime experience at sea who will get to know the bridge team, equipment set-up and vessel programme almost as well as if they were on board. Through this the advantages to you include:

- A facility to return charts to storage in our secure office
- We won't sell you products and licences you don't need
- We'll refine your orders for planned shipping routes and operating areas
- Our short notice ability to Print-On-Demand official BA charts for immediate dispatch
- A unique login to our on-line account for order placement, review and payment

Chart Correction service

We provide the NaviGate software for your chart correction and T and P requirements of both paper and electronic charts. This easy-to-use software is fully approved by the UKHO thus meets Flag State requirements for the maintenance of the navigation chart outfit including the printing of reports.

What makes us unique?

We don't just exist to supply navigation stores; we're committed to improving safety and standards at sea which means not just working with our clients but also the suppliers, distributors, regulators and Flag States. We're constantly striving to improve the availability of navigation data on both paper and electronic charts particularly in the more remote areas of the world where you operate.

Other services we provide.

There's more to life than just navigation, which is why we also provide advice, guidance, consultancy and on-board training in areas of:

- ECDIS Risk Assessment and operation
- Crisis Management (MCA accredited)
- Navigation assessments
- Crowd Control
- Firefighting
